

A Terminal outcomes across 54 prespecified routes

27 nuclear candidate contexts • 27 eQTL routes • 27 sQTL routes

42

No regional AD GWAS signal

Regional P gate not passed

4

No candidate QTL signal

Candidate eQTL gate not passed

2

Model or LD incompatible

Required model or matched LD unavailable

6

Not assessable

Target sQTL status unresolved

Terminal categories are mutually exclusive—not sequential funnel losses.

A route stops at its first unmet input gate.

B Posterior boundary

0

valid primary H0-H4 results

PP.H4 unavailable

No route reached posterior estimation
