

A. Upregulated all mitochondrial-related genes in AD

Validated Phase 09 tiers; Phase 08 MAST paper_deg; line 1 = DEGs/tested assay features; line 2 = AD/NCI donors

B. Downregulated all mitochondrial-related genes in AD

Validated Phase 09 tiers; Phase 08 MAST paper_deg; line 1 = DEGs/tested assay features; line 2 = AD/NCI donors

C. APOE comparisons within females

Jointly tested Phase 09 assay features in all_mito_related; line 2 = first AD/NCI donors | second AD/NCI donors

D. APOE comparisons within males

Jointly tested Phase 09 assay features in all_mito_related; line 2 = first AD/NCI donors | second AD/NCI donors

E. Female-versus-male comparisons within APOE groups

Jointly tested Phase 09 assay features in all_mito_related; line 2 = female AD/NCI donors | male AD/NCI donors
