

A Each cerebrospinal-fluid biomarker

Amyloid- β 42

GCST90726396

1 **APOE**
both genetic tests passed

1 APOE **18** other genes

18 other nuclear genes

Did not pass both genetic tests

Total tau

GCST90726397

1 **APOE**
both genetic tests passed

1 APOE **18** other genes

18 other nuclear genes

Did not pass both genetic tests

p-tau181

GCST90726398

1 **APOE**
both genetic tests passed

1 APOE **18** other genes

18 other nuclear genes

Did not pass both genetic tests

B All 57 tests

3 **APOE-positive**
results

Same gene in all 3 tests

3 **54**

54 did not pass both
genetic tests

0 newly supported
genes

Three positive results = APOE for three biomarkers, not three genes

Nearby-variant + whole-gene tests do not show how APOE works or prove a shared variant.
