

Breadth and reproducibility of Case 3 key-driver candidates

Drivers outside the 1,136-gene core MitoCarta inventory

15 circle genes • 21 circle-displayed contexts • 22 total passing contexts

A Network evidence matrix

Tile number = within network Case 3 rank

capped $-\log_{10}(\text{ACAT } q)$

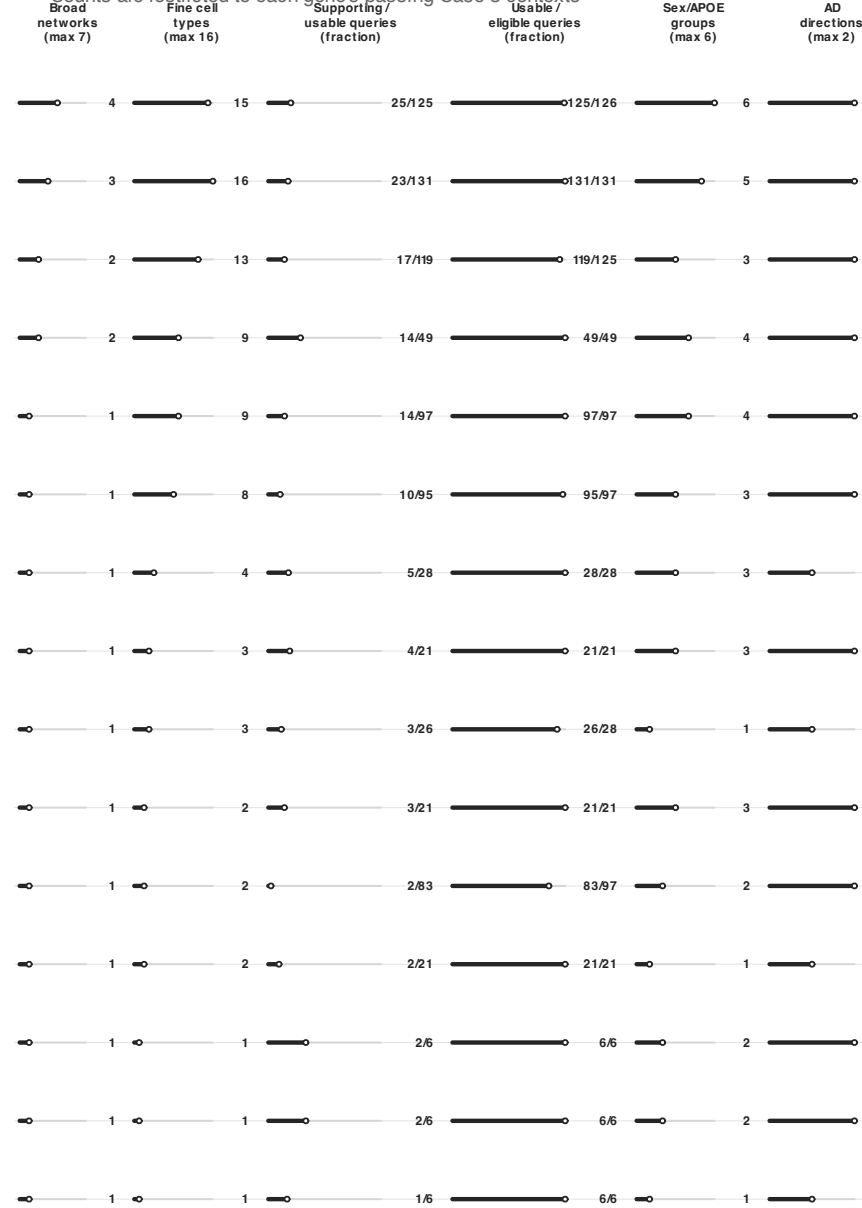

circle top five

passing, below cap

broader mitochondrial reference

B Breadth, recurrence and coverage

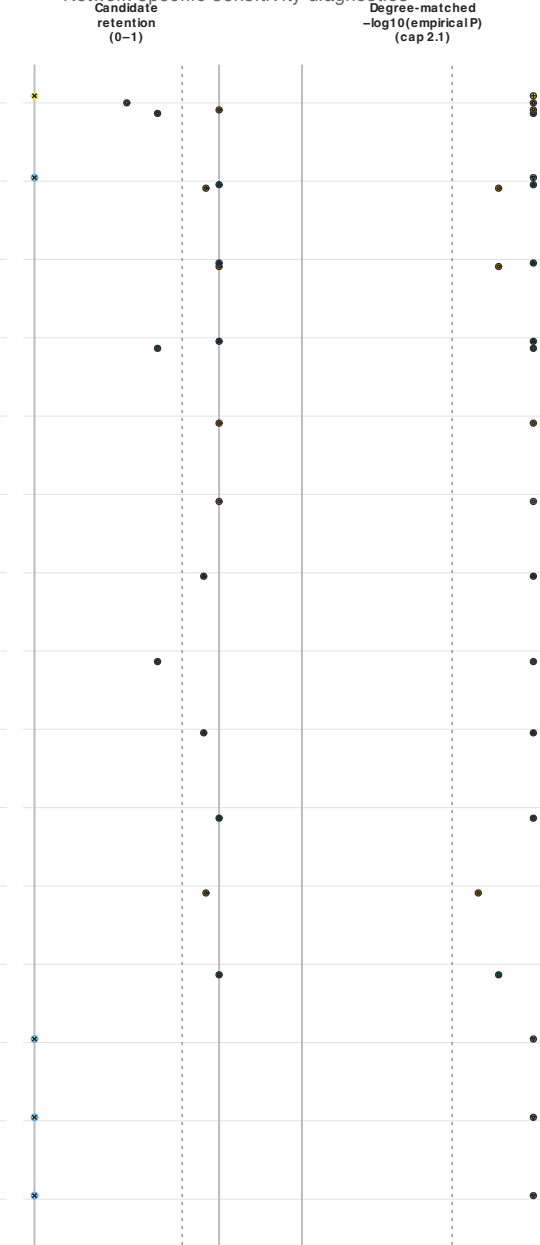

Counts are restricted to each gene's passing Case 3 contexts

Points/bars show the fraction or count; bold labels preserve raw numerators and denominators.

C Network robustness

Network-specific sensitivity diagnostics

● Astrocytes ● Excitatory neurons ● Inhibitory neurons

● Microglia ● OPCs ● Oligodendrocytes

● Vasculature ● stability not assessable
