

RPL11-centered excitatory-neuron consensus network

Concentric rings show minimum downstream distance; arrows follow the Bayesian-network direction

HOW TO READ

Node size and x/20 show neighborhood recurrence across the 20 supporting runs

NODE ENCODING

- Cytosolic ribosomal protein
- Recurrent mitochondrial query hit

NODE FILL · PHASE 8 DIRECT DEG

- Both AD-up and AD-down
- AD-down only
- AD-up only
- No stored direct DEG

PATHWAY MARKER

Small colored dots beside a node; multiple dots show memberships

- Cytosolic ribosome
- ETC / oxidative phosphorylation
- Mitochondrial protein degradation
- Cristae formation

RING DISTANCE

D1, D2, D3: minimum directed steps from RPL11

DISPLAY SCOPE

All direct RPL11 edges: 0 incoming, 9 outgoing
Deeper mitochondrial hits retained at 4/20 or more
