

Phase 18 RPL11 network evidence: upstream context, downstream mitochondrial modules, and specificity

A

Excitatory neurons: RPL11-rooted directed subnetwork

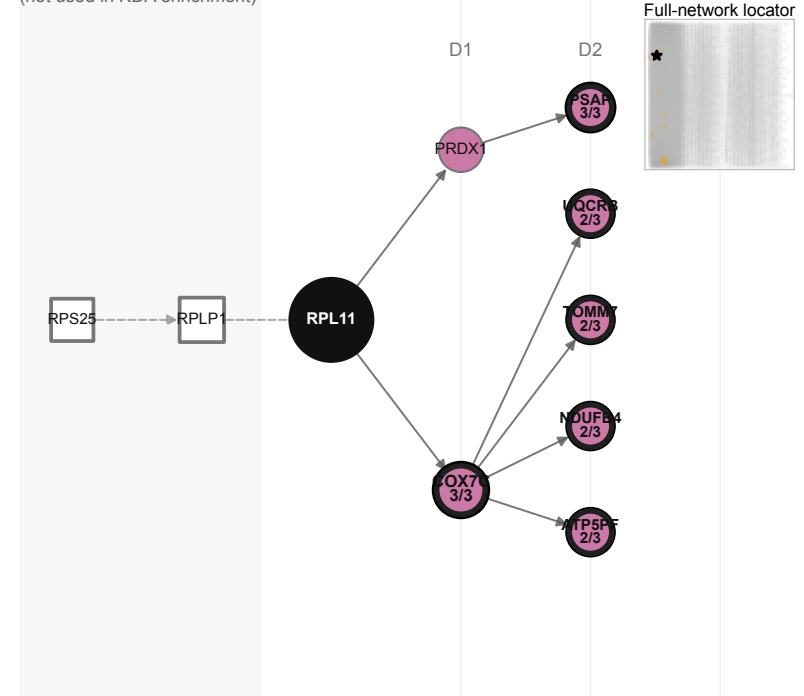

Support 20/97 usable runs | aggregate q=1.84e-09 | stability 14/14
19/20 supporting runs selected layer 3

B

Astrocytes: RPL11-rooted directed subnetwork

Support 3/20 usable runs | aggregate q=3.44e-05 | stability 2/3
Upstream context (not used in KDA enrichment)

C

Supporting run × mitochondrial query-hit depth

D

Matched-control specificity
