

RPL11-centered excitatory-neuron consensus network

Radial position groups nodes by minimum downstream distance; arrows follow the Bayesian-network direction

HOW TO READ

Node size and x/20 show neighborhood recurrence across the 20 supporting runs

Thick black border: recurrent mitochondrial query hit

NODE FILL · PHASE 8 DIRECT DEG

Both AD-up and AD-down

AD-down only

AD-up only

No stored direct DEG

PATHWAY OUTLINE

Colored outer boundary; segments show multiple memberships

Cytosolic ribosome

ETC / oxidative phosphorylation

Mitochondrial protein degradation

Cristae formation

RADIAL DISTANCE

D1, D2, D3: minimum directed steps from RPL11

DISPLAY SCOPE

All direct RPL11 edges: 0 incoming, 9 outgoing

Deeper mitochondrial hits retained at 4/20 or more
