

RPL11-supporting mitochondrial queries: shared and context-specific network hits

A Excitatory neurons

AD-up union
21 genes from 7 queries

AD-down union
24 genes from 13 queries

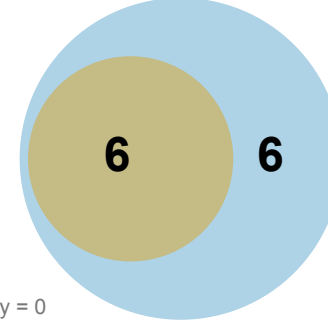

Counts are unique RPL11 mitochondrial query-hit genes
(circle areas are not proportional)

B Astrocytes

AD-up union
6 genes from 1 queries

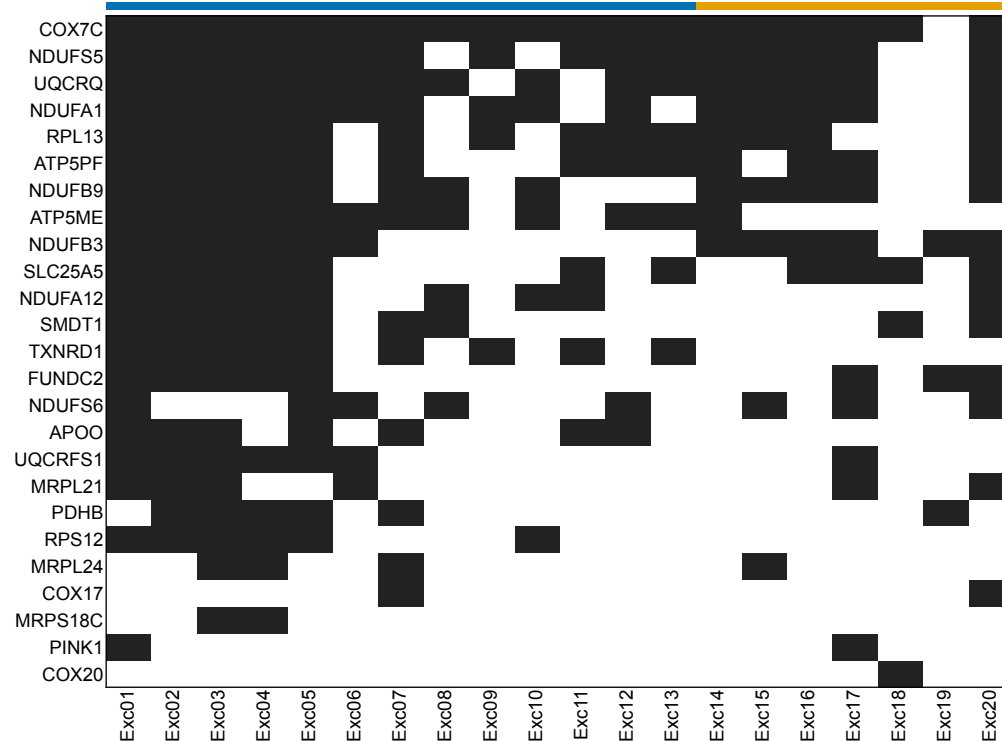

AD-down union
12 genes from 2 queries

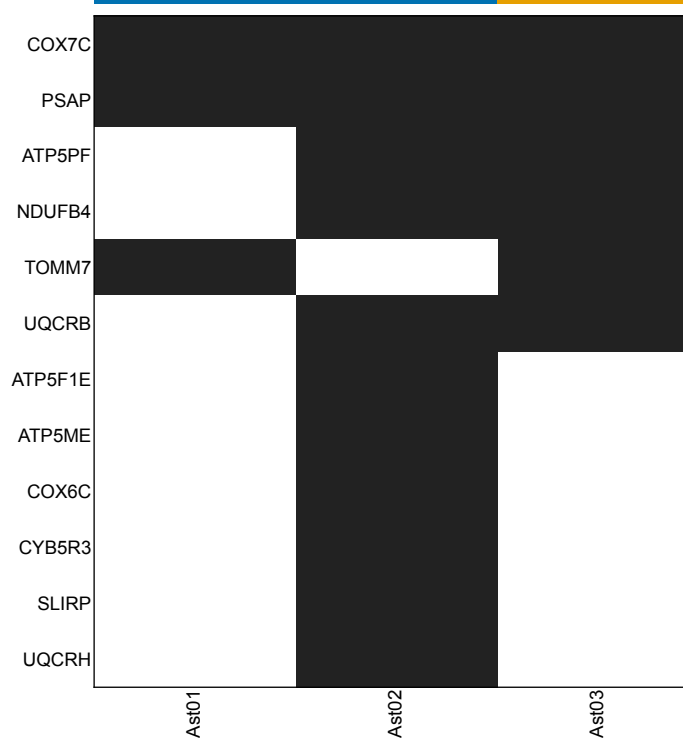

AD-up only = 0

Counts are unique RPL11 mitochondrial query-hit genes
(circle areas are not proportional)

C Exact membership across 20 excitatory supporting queries

D Exact membership across 3 astrocyte supporting queries

Single-query summaries

Microglia, AD-down (1 query; 5 hits)
APOO, ATP5F1E, FTH1, TXNRD1, UQCRB

Oligodendrocytes, AD-down (1 query; 4 hits)
ATP5MC2, FTH1, RPL13, TXNRD1
