

APOE e4-shared and e4-divergent mitochondrial transcriptional responses in AD

core_mito; mitochondrial-restricted Yu analogue; Human MSigDB C2:CP v2026.1.Hs

B. C2:CP pathway enrichment

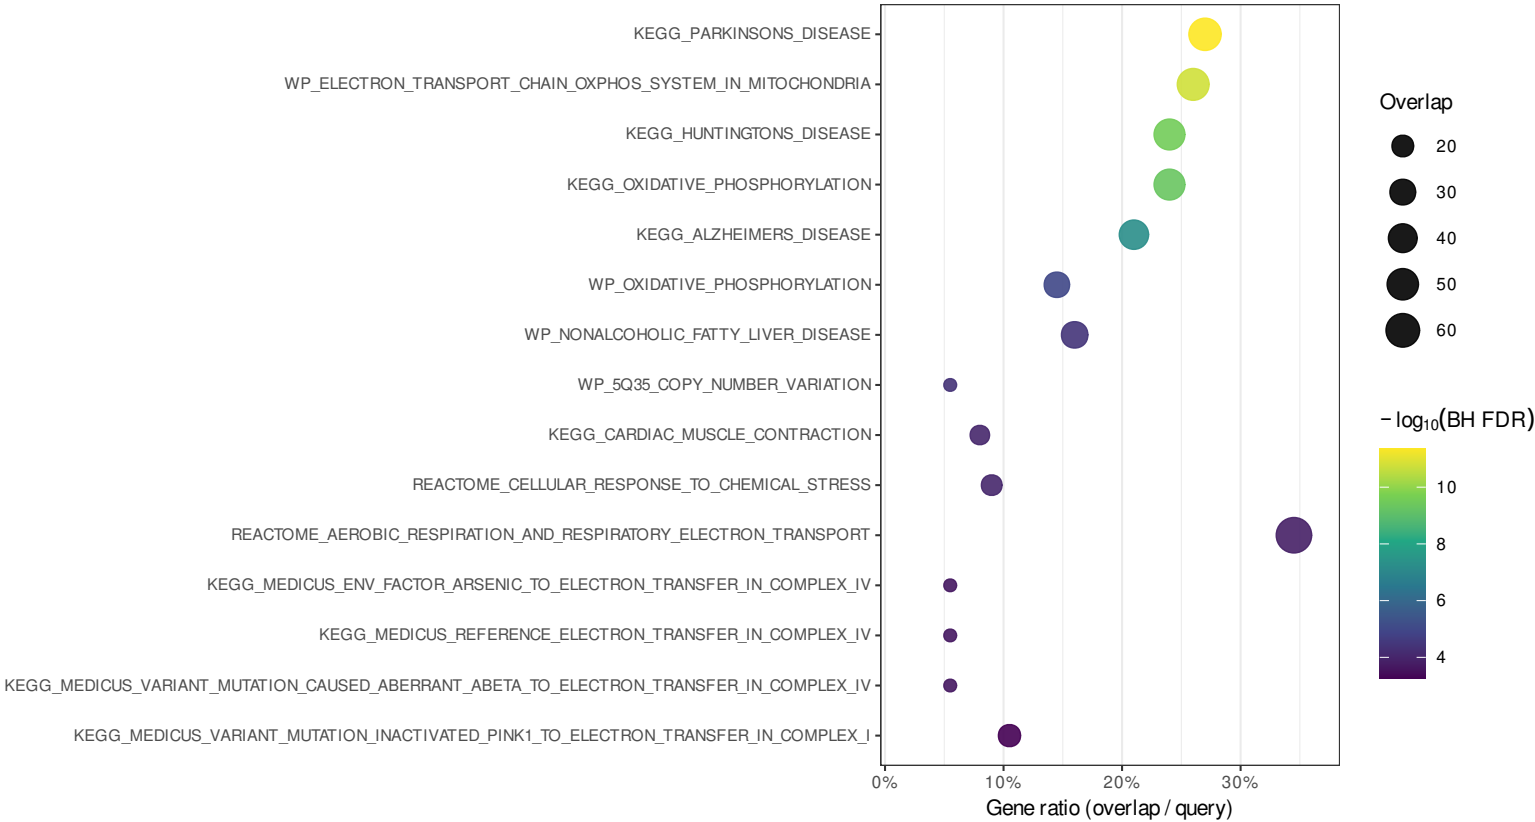

Highest similarity

n=200, N=686; 0 significant; 0 shown

Lowest similarity

n=200, N=686; 53 significant; 15 shown; 38 omitted by cap

Panel A uses stored Phase 10 ranks and observed paired-state counts; missing states are excluded. * denotes directional BH FDR <= 0.05. Panel B: x = gene ratio, size = overlap, color = within-query BH FDR.
